

Navigating the U.S. Healthcare Market - Insights into DSCSA Compliance and IRA's Impact on Drug Discovery

The U.S. is recognized globally as a leading innovator and research center in biotechnology. At the same time, the U.S. healthcare market is constantly changing and offers companies a wide range of opportunities as well as challenges. Currently, not only the Drug Supply Chain Security Act with its specific requirements and regulations has to be considered, but also the Inflation Reduction Act with its significant impact on drug development and research.

The WebSeminar provides valuable knowledge into the U.S. market, exciting insights into current developments such as DSCSA and IRA, and a unique opportunity to interact with industry experts from the U.S..

Time and Place

Tuesday, 26.09.2023, 15:00 –17:00 (CET)

hybrid (online via zoom or on site at BioM Biotech Cluster Development GmbH, Am Klopferspitz 19 a (IZB West II, 3. OG), 82152 Martinsried/München)
