

Institute of Molecular Infection Biology (IMIB)
University of Würzburg
Josef-Schneider-Str. 2 / **Building D15**
97080 Würzburg

DIRECTIONS

By Train:

Arrival at the Hauptbahnhof Würzburg (Main Station). You can reach the main area of the University Hospital with the trams no. 1 and 5 (towards Grombühl). Both trams head directly to the Institute and are generally available every 8 minutes. The ride will take about 6 minutes. Please leave the tram at the stop "Würzburg Uni-Klinik, Bereich D". Across the street, about 10 meters up the hill, you will see a big steel gate for pedestrians. After you have passed that gate, you will see a yellow building directly in front of you. This is the building D15, in which the **Institute of Molecular Infection Biology (IMIB)** and the Helmholtz Institute for RNA-based Infection Research (HIRI) are located.

A walk from the Main Station takes about 20-25 minutes.

By Car:

We have four different parking areas, which can be used for parking. The closest area to our institute is area C and D, but unfortunately at times, it's hard to find a free slot. In area A-B is a big parking garage, where you usually always get a parking spot. The walk from the parking garage in area A-B takes about 10-15 minutes.
