

Agentic AI in Life Sciences: From Hype to Strategic Deployment

May 12, 2026 | 9 am – 8 pm

Sky Room, IZB Residence CAMPUS AT HOME, Am Klopferspitz 21, 82152 Martinsried

Agentic AI is quickly moving from a technical topic to a **strategic leadership priority**. For leaders in biotech, pharma, and biomedical research, the pressure is rising to understand where Agentic AI truly creates value, which use cases are realistic, and what governance and regulatory considerations they need to address.

This **exclusive one-day Executive Session** provides decision-makers a **structured orientation, realistic assessments, and a pragmatic roadmap for introducing Agentic AI** into their organizations.

Program Overview

Morning · **ORIENT – Expert Insights & Strategic Framing**

- What Agentic AI truly is – beyond the hype
- Common leadership misconceptions
- Where Agentic AI creates impact in life sciences
- Regulatory and organizational realities
- Interactive knowledge exchange

Noon · **EXCHANGE – Facilitated Discussion & Networking over Lunch**

- Open dialogue based on the morning's insights
- Initial strategic positioning for each organization
- Key questions to prepare for the afternoon session

Afternoon · **APPLY – Hands-On Use Case Design & Prioritization**

- Structured ideation based on 60+ life-science use cases
- Evaluation across value, maturity, regulatory sensitivity, readiness
- Governance & accountability mapping
- Prioritized shortlist for each participant

Evening · **CHALLENGE – Thought Leader Discourse & Networking**

- Impulse and fireside chat with **Dr. Anna Bauer-Mehren (Roche)**
- Joint discussion of strategic implications
- Networking with fingerfood and drinks

Format: In-person event

Language: English
